Cleanaway prioritizes education and community engagement and recognizes that education is essential to our business and achieving our mission of making a sustainable future possible together.

Our education aligns with our core Sustainable Development Goals (SDG's), namely Sustainable Cities and Communities (SDG11), Responsible Consumption and Production (SDG12), Climate Action (SDG13), and Life on Land (SDG15).

With these SDGs in mind, we have created a comprehensive schools education program that not only aligns with the Western Australia Curriculum and our Sustainable Development Goals, but is also specific to our customers specific endorsed waste management system/s.

The aim of our school's program is to educate students on the waste hierarchy, focusing on waste and contamination minimization and equipping students with the knowledge to make wise waste decisions going forward, in their homes, schools and communities.

Our comprehensive Incursion Education Program is aimed at Year 1 to Year 6 students over a one (1) incursion with a follow up quiz via the Kahoot application. We also provide additional programs focusing on best practice waste management in the schools, that may include the facilitation and setting up of composting, worm farms and waste wise collection points for waste streams such as soft plastics, textiles and CDS eligible containers.
